

# Neznámá pravda o společnosti Keshe Foundation

---

Společnost **Keshe Foundation** je zde, aby vám pomohla splnit sen, váš sen:

**Proměnit zbraně na užitečné nástroje. Doba je zde a můžete být při tom! Nové technologie jsou vaše a můžete je použít.**

Jsme svědky počátku nové doby míru a prospěchu pro všechny: společnost **Keshe Foundation** pro tento účel nabízí podrobný postup ... otevření poznání vesmíru lidstvu. Společně dokážeme vybudovat pozemský ráj, v této době.

Dříve, než pokročíme dále, je potřeba vysvětlit historii společnosti **Keshe Foundation** od doby, kdy začala veřejně působit, protože je to nezbytné k pochopení toho, proč jsme se rozhodli všechno zveřejnit. Zde je popis událostí:

## • 2004

- Zaslání článku "Vznik černých děr" do **British Astronomical Society** (Britská astronomická společnost). V ten samý den, kdy Mehran Keshe obržel odpověď z **British Astronomical Society** oznamující, že článek nebude zveřejněn, ale ponechán v jejich knihovně pro pozdější objasnění, **Steven Hawkins** oznámil změnu svého třicet let zastávaného názoru, že černé díry energii neuvolňují. Ve skutečnosti byl jeho nový názor stejný jako ten v zasláném článku.  
<http://forum.keshfoundation.org/forum/keshe-official/3128`2-stephen-hawking-has-abandoned-his-theory-of-black-holes>  
[Reference 1]
- Mehran Keshe kontaktoval společnost **BNFL** (Britské jaderné palivo: <http://en.wikipedia.org/wiki/BNFL>), protože potřeboval jaderný materiál k testování gravitačního reaktoru, aby mohl potvrdit koncept vzniku sil gravitačního pole. Kvůli ověření technologie byl představen ministru obrany Spojeného království, který ho pozval na vojenskou přehlídku ve Farnborough. Na této přehlídce, která kvůli nedorozumění znamenala konec spolupráce s brity, poznal společnost **FLAG** ([www.flag.be](http://www.flag.be)). Pan Keshe byl pozván panem Karel Vervoort, bývalým ředitelem **FLAG** do Belgie, aby technologii ověřili.
- **FLAG** tým pověřila profesora Mark Van Overmeire (<http://mech.vub.ac.be/avrg/members/marc.htm>) z **VUB** (Vlamse Universiteit Brussel, Vlámská univerzita v Bruselu).

## • 2005

- Zpráva profesora Mark Van Overmeire potvrzuje, že koncepty výroby energie jsou slibné a zmiňuje také, že "inženýrské problémy však nebyly analyzovány a budou důležité. Doporučuji tyto problémy velmi bedlivě prostudovat". V reakci na to požádala belgická vláda **Verhaert New Products & Services NV** ([http://www.verhaert.com/cms/images/stories/pdf\\_in\\_text/groupprofile.pdf](http://www.verhaert.com/cms/images/stories/pdf_in_text/groupprofile.pdf)), aby technologii otestovala.

[Reference 2]

Tato společnost po prozkoumání potvrdila, že chtějí investovat maximálně 500 000 € do tohoto výzkumu, ale potřebují k tomu partnera.

- V emailu ze 30. května 2005 **Verhaert NV** navrhuje jako vědeckého partnera **VITO** (Vlámské jaderné centrum v Mol: <https://www.vito.be/VITO/NL/HomePageAdmin/Home>). Stejný email zmiňuje, že napíše návrh do **IWT** (výzkumný spolek vlámské vlády: <http://www.iwt.be>), aby projekt financoval.

[Reference 3]

- Po obdržení smlouvy z **Verhaert NV** pan Keshe požádal zprostředkující organizaci, aby poskytla specializovaného právníka pro vyjednávání ohledně této smlouvy. Pověřili tím pana Hans Bracquené. Bylo domluveno setkání k projednání této smlouvy s **Verhaert** v zastoupení pana Keshe. Toto setkání proběhlo v kanceláři Hans Bracquené v Leuven (<http://www.bracquene.be/en>). Byli přítomni čtyři lidé: pan Bracquené, jeho sekretářka, pan Keshe a jeho žena. Pan Keshe měl podezření, že Hans Bracquené je také právníkem **Verhaert** a že taky sám smlouvu napsal. To je protizákonné a při položení této otázky přiznal, že to tak opravdu je, ale jako odpověď napsal na kousek papíru jména čtyř společností, které hodlají pana Keshe zabít, kdyby odmítl spolupráci. Pan Keshe okamžitě ukončil setkání, po kterém začaly všechny ty problémy s belgickou vládou. Poznámka: Toho času byl Hans Bracquené také interním právníkem **VITO**.
- Interní právník **IWT** je opět Hans Bracquené a v roce 2003 byl také předsedou kabinetu ministra Van Mechelen a společně položili I základní kámen společnosti **IMEC**. <http://www.dirkvanmechelen.be/2003/minister-legt-eerste-steen-van-nieuwe-imec-gebouw/?foto=0>
- V novinách **De Standaard** byl 19. prosince 2003 zveřejněn následující článek: [http://www.standaard.be/cnt/dst19122003\\_008](http://www.standaard.be/cnt/dst19122003_008)

#### "Předseda kabinetu již nemá kontrolu

Brusel -

Hans Bracquené, předseda kabinetu pana Dirk Van Mechelen, řekl, že uvolnil jeho pozici vládního zmocněnce v technologickém institutu **IWT**. Důvodem je vyloučení střetu zájmů.

Hans Bracquené (<http://www.iplodge.be/team-hans-bracquene.html>, <http://www.birmingham.ac.uk/research/activity/iel/news/2013/trybus-ESA.aspx>, <http://www.bracquene.be/en>) je právní expert v technologických inovacích, o tom není pochyb. Všechna vystoupení ve vlámském parlamentu včera začala tímto prohlášením. Pak ale bylo řečeno, že pan Bracquené je současně předsedou kabinetu a vládním zmocněncem v **IWT** a k tomu všemu ještě provozuje jeho vlastní právní poradenství pro vysocotechnologické společnosti (viz **De Standaard** 18. prosince). V pozici předsedy kabinetu radí ministři v rozhodování, jako například přidělení milionů euro technologické společnosti **IMEC** ..."

(Náš komentář: Byl interním právníkem **IMEC**).

- Toto je taky zajímavé: **Qinetiq**, britská mezinárodní technologická společnost pro obranu sídlící ve Farnborough, vlastněná britským ministerstvem obrany, získala 90% podíl společnosti **Verhaert Design and Development NV** v září 2005. Šlo o jedinou zahraniční investici mimo Spojené království, kterou britské ministerstvo obrany uskutečnilo.

- **Qinetiq** (<http://en.wikipedia.org/wiki/Qinetiq>) za tu investici zaplatila 10 000 000 €, aby se dostala ke Keshe technologii. Neměla ale zážehový klíč, aby mohli technologii použít, proto požadovali vrácení peněz, což se však nestalo.
- V článku novin **De Tijd** je řečeno, že **Qinetic** znovu prodává **Verhaert**. Skutečný důvod ovšem nesdělili.  
[http://www.tijd.be/nieuws/ondernemingen\\_technologie/QinetiQ\\_zet\\_satellietbouwer\\_Verhaert\\_Space\\_in\\_etalage.8195332-436.art](http://www.tijd.be/nieuws/ondernemingen_technologie/QinetiQ_zet_satellietbouwer_Verhaert_Space_in_etalage.8195332-436.art)

## • 2006

- Pan Keshe zažádal společnost **E-Capital** (investoři: <http://www.e-capital.be>) o financování. Vyzvali pana Keshe podepsat smlouvu o mlčenlivosti s **IMEC** (Leuven). **IMEC** je hlavní podílník **E-Capital**.
- **IMEC** ([http://www2.imec.be/be\\_en/home.html](http://www2.imec.be/be_en/home.html)) určila profesora William D'Haeseleer (vedoucího jaderného oddělení univerzity v Leuven: <http://www.kuleuven.be/wieiswie/en/person/00014331>), aby posoudil technologii pro výrobu energie. Za přítomnosti dvou vedoucích z **E-Capital** prohlásil, že technologie byla na 90% až 95% správná, ale přesto musí být odmítnuta. Jde o stejného vědce, který poradil belgické vládě, jako člen komise, dát zdarma jaderné reaktory (národní majetek!) společnosti **SUEZ** (<http://www.gdfsuez.com>).
- Na žádost vedoucích **E-Capital**, během vyjednávání, provedl **IMEC** nezávislé posouzení výroby nanomateriálových sp2 a sp3 prvků v láhvi od Coca Coly. Připravili zprávu potvrzující výrobu materiálu sp2 nanovrstvy a sp3 nanodiamantové vrstvy, což doposud nebylo v atmosférických podmínkách Země uskutečněno. Byl to významný technologický průlom. V registrovaném dopise společnosti **Keshe Foundation** jí právník společnosti **IMEC** zakázal zveřejnit tento objev popsany v jejich důvěrné zprávě.  
[Reference 4]
- Poznámka: Registrovaná nezisková společnost **Keshe Foundation** je vlastněna světovou populací. V důsledku toho má každá lidská bytost, jako člen, právo na tuto důvěrnou zprávu ve společnosti **Keshe Foundation** bez porušení smlouvy o mlčenlivosti.
- Nanomateriál zmíněný v této zprávě je stejný jako ten nabídnutý obyvatelům světa pro řešení Fukušimy 30. ledna 2014.  
<http://forum.keshfoundation.org/forum/keshe-official/31153-fukushima-daiichi-nuclear-accident-cleanup-video>  
[Reference 5]
- **IMEC** v této zprávě, kvůli neporozumnění jednoduchosti výroby sp2 a sp3, nařkl **Keshe Foundation** z používání jaderných materiálů a úmyslně označili **Keshe Foundation** jako podvodnou (zločineckou) organizaci, která má přístup k jadernému materiálu. Bylo to vynuceno bezpečnostní strukturou belgické vlády panem Hans Bracquené.
- Později v roce 2006, na žádost belgické vlády, pokračovalo jaderné centrum **SCK** v analýze Coca Cola láhve a materiálů v ní vytvořených.  
[Reference 6]

V tomto testu se snažili zjistit, jak lze vytvářet nanomateriály bez použití gama paprsků a uranu nebo plutonia. Část zprávy potvrzuje, že se v materiálu nachází uhlík.

- **2009**

- Úpadek společnosti **OPEL**. Vlámská vláda se obrátila na společnost **Keshe Foundation** ohledně převzetí továrny **Opel** v Antwerpách. Během těchto vyjednávání byla panu Keshe zakázána další spolupráce s jakoukoli vědeckou organizací v Belgii.

- **2010**

- Pan Keshe zatčen v Kanadě.  
<http://www.keshefoundation.org/media-a-papers/keshe-news/124-canada.html>  
[Reference 7]
- Zločinecká organizace vyhrožovala panu Keshe jeho zabitím. Útočník byl vyslýchán teprve jeden a půl roku po otevření případu policií. To bylo zamaskováno speciální policií zastrahující vědce v Belgii. Úředník, který se toho účastnil, je ovládán zločineckou organizací v belgické vládě.
- V květnu vyšel článek o technologiích společnosti **Keshe Foundation** v časopise **Elektuur**.  
[Reference 8]

- **2011**

- Policie zablokovala část technologie 25. listopadu, aby poškodila prezentaci na konferenci v Eindhoven, kterou měl pan M. T. Keshe 26. listopadu.  
<http://www.youtube.com/watch?v=45o8O4-bQHE>
- Následující pondělí 28. listopadu v Belgii došlo k pokusu o vraždu pana M. T. Keshe, kdy bylo záškodnický poškozeno jeho auto odpálením elektronicky dálkově ovládané malé výbušniny pod autem ve vysoké rychlosti. (To je známo jako otisk práce společnosti **IMEC** při pokusech o vraždu vědců, kteří s nimi nechtějí spolupracovat.)

- **2012**

- Král Belgie Albert II. vstoupil do kavárny, kde psal pan M. T. Keshe svou knihu, a mluvili spolu. Následující den král a jeho úředník volali do kavárny majiteli, že je pan Keshe terorista a aby se ho co nejdříve zbavil.
- Ředitel **FANC** (Federaal Agentschap voor Nucleaire Controle: <http://www.fanc.fgov.be>) v Bruselu během setkání panu Keshe nařídil, jako zástupce belgické vlády, aby opustil Belgii.

- **Naturopathica** udělila společnosti **Keshe Foundation** certifikaci Keshe plazmatické léčby. [Reference 9]
- **2013**
  - Protože M. T. Keshe nesouhlasil s nařízením společnosti **FANC**, byla do jeho domu v Belgii vyslána vraždící jednotka v rámci **Federální policie** s osmi úředníky, aby udělali předstíranou nehodu, a ti samí úředníci přišli již předchozí den.
  - **Keshe Foundation** opouští Belgii, aby se vyhnula pokusům o vraždu **Federální policií**.
- **2014**
  - Začal další pokus o poškození **Keshe Foundation Federální policií**, stejným úředníkem, který byl zapleten v předchozích dvou pokusech o vraždu a v předstíraném vyšetřování. Čestní úředníci **Federální policie** v belgických policejních složkách vyšetřující jiný případ vraždy (se stejným úředníkem) potvrdili panu M. T. Keshe na policejní stanici, že zmíněný úředník je zločinec a že vyšetřování bylo prováděno zločineckým způsobem a taky že pracuje ve prospěch jistých organizací ve **Federální vládě**.

Toto odhalení je součástí procesu Celosvětové mírové smlouvy jak je společností **Keshe Foundation** plánováno na rok 2014, kde jsme slíbili, že poznání by mělo být dostupné všem.  
<http://forum.keshefoundation.org/forum/keshe-official/30510-2014-the-year-of-the-change-for-the-humanity>

[Reference 10]

Nové poznání a technologie přináší nová řešení pro hlavní globální problémy. Hladomor, nedostatek vody a elektrické energie, změny klimatu a nemoci bude možné překonat použitím nového typu plazmatických reaktorů a umožní člověku opravdovou svobodu cestování vesmírem.

Správnost technologie společnosti **Keshe Foundation** byla ověřena po dobu 10-ti let, což můžeme vidět ve výše zmíněných nezávislých zprávách, ale nebyla zveřejněna kvůli zastrašování panem Hans Bracquené a panem Delanoy, úředníkem belgické **Federální policie**, kteří byli zapojeni ve všech třech případech. Nyní technologii nabízíme zdarma, abychom mohli prožít hojné, zdravé, radostné a prospěšné životy, všichni obyvatelé Země, ne jen hrstka, sdílením poznání vesmíru.

Lidé na celém světě odhalují lži a podstatné trhliny v současné zmanipulované realitě a my to již nechceme tolerovat!

Všichni společně proslápneme cestu k nové civilizaci, kde budou vědomí lidé s otevřeným srdcem respektovat všechny živé bytosti.

Společně dokážeme vybudovat pozemský ráj, v této době.

Marek Ištváněk

hledající poznání

## Stephen Hawking has abandoned his theory of Black Holes

02-04-2014, 05:36 PM

In the on line paper released by Stephen Hawking on 24.1.2014, he calls it his blunder.

<http://arxiv.org/pdf/1401.5761v1.pdf>

Read more in this link

<http://www.cbc.ca/news/technology/st...bate-1.2514299>

"In his paper, Hawking writes: "This suggests that black holes should be redefined as metastable bound states of the gravitational field."

In a simple word he confirms the theory of M T Keshe about the creation of Black Holes of what Keshe calls the Principal stars magnetic fields (in possession of both gravitational and magnetic fields) to be correct and that these environments in the universe, be they in the center of the universe, galaxies, protons or electrons, they are all the sources of energy and magnetic fields in their environment and the origin of life of that entity.

The reason they are so dark is fully explained in the paper by M T keshe (Author of the paper 'The creation of Black hole' (original version 2004) and the revised version published in his book 'The origin of the universe' in 2011 page 151 (1).

M. T. Keshe contradicted Stephen Hawking's false assumption in his very first paper submitted for peer review in 2004 to Royal Astronomical society.

In the recent years and months, Keshe has put forward many new clear theories in how wrong Stephen Hawking's assumptions have been about his Black hole theories.

Now keshe says "The unfounded theory by Stephen Hawking for the past thirty years that Black holes are giant eating machines, and keeping the same rhetoric up to 2004 is finally over", with Stephen Hawking bows out after ten years of battle confused and disorientated about his own theory about the Black hole.

The unknown history about these two scientists:

In April of 2004, M T Keshe submitted a paper entitled 'The creation Black Holes', for peer review to Royal Astronomical society.

On the same day in July the 8<sup>th</sup> in 2004 as M T Keshe Received a letter from Royal Astronomical society stating that his paper about creation of the Black Holes will not be published, and the Society will be keep the paper in their library, Stephen Hawking coincidentally on the same day (8.7.2004) said publicly that he had changed his mind and that Black Holes do indeed leak radiation and had lost a bet to his friend. Later on that month, at the Dublin conference on 21.7.2004, with the use of many equations he did not convince any of the people attending the meeting as to the reason for his U-turn.

In his paper, M T keshe confirms that light and radiation escapes from Principal stars (Black holes) and he confirms that the Black holes, are in essence the birthplace of matter and source of creation in the universe.

In any case, Keshe Foundation has published the revised version of the paper in the book 'The origin of the universe' ISBN 978 94 60870002 in 2011, and the copy of the original letter from the Royal Astronomical society were released in this book page 177 as an appendix to the 'The creation of Black hole' paper and that Black holes release radiation and they are the sources of life.

Keshe says " In the book in an open letter placed before the original paper, he mentions about the coincidence of the date of his letter and the scientist changing his mind after thirty years.

Further, it took three years until now from Keshe publishing his book for Hawking to find a way out with the release of his 2014 paper.

Keshe say, "I wonder if we are ever going to receive a letter of apology from Mr. Hawking or the Royal Astronomical society."

Keshe says that Mr. Stephen Hawking in this open paper has not said anything new and he is just as an eminent scientist confirming our findings.

M T Keshe has said in his latest interviews and on line workshops in 2014 "three days after I gave a lecture in Leuven city in Belgium in 2011 about the book, Stephen Hawking turned up in the same university out of nowhere and gives a lecture under the same name as the book 'The origin of the universe' (check the Belgium press).

With the release of this paper, Stephen Hawking is trying to limit his exposure, as no one would have known about M T Keshe in 2004, when he was an obscure and unknown scientist. Because of this obscurity, the Royal Astronomical Society and Stephen Hawking could try to walk away with the glory of being a reputable institute and a man of intelligence who could change his mind.

Now that finally Stephen Hawking has decided to bow out and with it at the same time acknowledges the correct findings of M T Keshe, says with this change of mind nearly ten years later. Keshe says "so after ten years of battle to publish my paper to show its contents were the correct principles about the workings of Principal stars (Black holes), the cover-up attempts of the Royal Astronomical society and Stephen Hawking have come to an abrupt end."

Keshe has said, "We do not think that the Royal Astronomical society has any more creditability in the world of science to be a peer review journal, as it shows their peer-review is nothing but a disgrace and manipulation by scientists whose opinions they rely on. These thieves of the peer-review bodies silence new and correct discoveries for their private or personal benefits.

Now we hope readers understand why the Keshe Foundation releases its knowledge and technology directly to public as they have done recently with their Fukushima decontamination video and their 9<sup>th</sup> workshop (3,4) with open disclosure of new methods of producing Nano materials at zero costs, in how decontamination of Fukushima's land and water can be carried out and how he keeps their work out of the dishonest and false structured peer review organizations and their disgraceful scientists.

Keshe says " My belief has been that with the open communication systems available today, you take wisdom from my papers according to your intelligence. You peer review any paper according to your own knowledge and you do not need another person according to their private and personal interest to tell you what you need to think."

" Now the question is whether the keshe model of the plasma, the new structure of the Principal star (Black hole), the existence of principal magnetic and gravitational fields and matters strength as explained in the books of the M T Keshe is to be the new model in physics for the center and their behavior in galaxies and other entities in the universe."

On behalf of the Stichting the Keshe Foundation

### Report on the project proposed by Mr. Keshe

This report is based on a number of papers, written by Mr. Keshe. As these papers are part of a non-disclosure contract, I cannot add them as annexe.

The project deals with the production of energy by a fusion-like process on hydrogen in a reactor. The papers describe the principles, operation and design of the reactor. The principles describe processes similar to the energy production in stars. In the reactor similar conditions will be created through turbulence, centrifugal forces, pressure and electromagnetic fields. This is described in the reactor design paper, while start-up and operation of the reactor are described in the paper on the operation of the reactor.

The papers refer to scientific and pseudo-scientific papers. In the papers there are no scientific calculations of the process parameters. Also the design of the reactor is only described and no strength or other calculations are performed. The same is true for start-up and continuous operation of the reactor.

The concepts behind the energy production are feasible, The engineering problems however are not analysed and will be important. I advice to study these problems very carefully.

As my research field does not concern nuclear energy production, I strongly advice that a second opinion on the practical feasibility of this project should be given by an expert in the field.

Prof. Dr. ir. Marc Van Overmeire  
VUB, Department of Mechanical Engineering  
Brussels, March, 16, 2005

**VERHAERT**

NEW PRODUCTS &amp; SERVICES

Date: 26/04/2005

Dear Mr. De Potter,

After several technical – conceptual meetings with Mr. Keshe, Verhaert is interested in evaluating the feasibility of a project to develop an 'atomic fusion' reactor in cooperation with Mr. Keshe.

Mr. M.T. Keshe, with his extensive knowledge regarding nuclear physics and proven track record of publications in the required field, seems to have the required knowledge about concept and physics to the dimension such kind of a reactor chamber. Verhaert with its experience to build experiment reactors for research purposes (i.e. reactors for space experiments), will deliver the required multidisciplinary services to construct a proof-of-technology for the 'atomic fusion' reactor. However Verhaert is convinced that A third more academic partner is required to be successful, therefore a third party will be searched to assist the other parties in the research and development of the reactor. Verhaert suggests involving VITO as this third partner and will contact them as soon as possible. Vito can be an important partner due to their extensive knowledge in energy technology and material sciences and the availability of a hydrogen lab environment.

With kind Regards,

Verhaert New Products & Services

↳

Dear Mr. Keshe,

Thank you very much for your visit today. A brief resume of our meeting :

1. I will send you a contractual proposition by the end of this week.
2. I will start writing a IWT proposal, provisory submission date 30/06/06
3. As mentioned by telephone:

Verhaert is willing to invest his part of the development of 1 prototype of the reactor (for energy generation) following conditions:

- Å Å Å Å - the IWT proposal has been assigned positively.
- Å Å Å Å - A scientific partner shall be found (for example VITO or SCK) to:
- Å Å Å Å Å Å Å Å - Assist Verhaert in specific resources - disciplines (which might not be available in our pool)
- Å Å Å Å Å Å Å Å - Explosion safe & proof environment
- Å Å Å Å Å Å Å Å - As an additional screening of feasibility of the project at start and during the project
- Å Å Å Å Å Å Å Å - To assist in giving direction to the project as we find ourselves (i.e. VERHAERT) not with all required scientific disciplines.

The budget currently estimated is apprimatively between 300.000 and 500.000 å,- (based on information g today).

4. Next meeting 09/06 at 14.00h

With kind regards,

**VERHAERT New Products & Services N.V.**

**Raman spectroscopy sp<sup>2</sup>/sp<sup>3</sup>**

<i>Author(s):</i>			
<i>Date:</i>	06-07-2006	<i>Doc. No:</i>	P43699-sp2sp3
<i>Keywords:</i>	Raman spectroscopy, carbon		
<i>Distribution list:</i>	IMEC: External: -		

## Purpose

Raman experiment on a sample to check whether there are sp<sup>2</sup> or sp<sup>3</sup> clusters.

## Experimental set-up

Micro-Raman spectroscopy in backscattering. No analyser. Laser light is focused through a 100x objective on the sample. Wavelength: 458 nm, output power = 50 mW. Spectra are taken between 900 and 1900 Rcm<sup>-1</sup>. A narrow bandgap filter is used to get rid of the plasma lines of the laser.

Integration time:

S1: 60 sec (on dark area of the sample)

S2: 60 sec (on light area of the sample)

S3: 1000 sec (on darker area of the sample)

Measurement time: 2 hours

## Results

A first spectrum is taken with an integration time of 50 sec on a 'dark' area of the sample (Figure 1).

*Figure 1: Position where spectrum S1 is taken, dark area on the sample.*

The Raman spectroscopy result is shown in Fig. 2. The spectrum was taken in three scans, and there were problems with overlapping the three regions. We corrected for this for the last spectrum taken with a longer integration time (see further).

Figure 2

A second spectrum was taken in a brighter area. No peaks were found in that spectrum (see Fig. 3)

Figure 3

The two spectra are compared in Fig. 4, again showing that outside the dark regions no signal is seen.

Figure 6

## Discussion

The carbon atom has four valence orbitals, which can hybridise to form  $sp^2$  and  $sp^3$  orbital combinations. The  $sp^2$  forms planar structures with 3-fold symmetry at the carbon atom, and is found in aromatic molecules and in crystalline graphite. The  $sp^3$  forms the basis for 3-dimensional, tetrahedrally bonded carbon as in methane ( $CH_4$ ) and in diamond.

Graphite has a first order phonon at about  $1580\text{ cm}^{-1}$  called the G (graphite) line, which is fairly sharp. When the long order of the graphite lattice is disturbed, a second line appears near  $1360\text{ cm}^{-1}$ , called the D (defect) line. The lines shift with increasing disorder but also with used wavelength to excite the Raman spectrum.

Yoshikawa et al. (Phys Rev B, Vol 46 (11), 7169, 1992) shows that in glassy carbon (GC) two Raman bands are observed at  $1355\text{ (D)}$  and  $1590\text{ cm}^{-1}\text{ (G)}$  (see Fig. 7). The  $E_{2g}$  mode at  $1590\text{ cm}^{-1}$  shifts towards lower frequency and the position of the disorder mode (D) to a higher frequency, with an increase of B implantation. The Raman spectra of GC crystals with B implantation are very similar to the ones of a-C:H.

According to Yoshikawa et al., the two bands observed in the spectrum are due to  $sp^2$  carbon clusters. They do not agree with Wagner et al. (Phys Rev B40, 1817 (1989)) who claims that the band between  $1400$  and  $1550\text{ cm}^{-1}$  is due to  $sp^3$  carbon clusters and the one near  $1600\text{ cm}^{-1}$  is due to  $sp^2$  clusters.

We observe a spectrum that corresponds very well to the one of a-C:H, or to the one of glassy carbon but with a large B implantation, i.e. with many defects. Following Yoshikawa, this indicates the presence of  $sp^2$  carbon clusters on the sample.

If there would be  $sp^3$ , we would expect a sharper peak near  $1343\text{ cm}^{-1}$ . This is not the case. However, we cannot exclude the possible presence of  $sp^3$ . Its spectrum might be covered by the broad  $sp^2$  defect line.

Some remarks:

The Raman spectroscopy instrument of IMEC is not the best instrument for this kind of studies. It is optimized for stress measurements, and has as a result a rather limited spectral range. Due to this, we have to take three spectra and overlap them in order to span the required spectral range for these studies. This gives rise to problems in intensity when overlapping, and results in a 3 times longer measurement time than would be required when a more appropriate tool would be used.

### 7.2.2. *Total carbon content by full combustion and NDIR detection*

One non-immersed coated electrode (nr. 2) obtained during experiment LQ3-2/EXP/SC/000/281106 was further examined to determine the content of total C in the surface layer deposit. These measurements correspond to experiment LQ3-2/CHE/SC/020/121206 as reported in table 2. Two measurements were taken. The first one consists in submitting part of the coated wire (including the metallic copper substrate) to the analysis. This test revealed that the total C content represents less than 0.008 wt. % of the total weight of the sample. The second measurement was carried out to better focus on the surface layer deposit: 2.9 mg of the black coating were carefully peeled off the electrode by mechanical means. The analysis indicates that C represents less than 2.1 wt. % of the layer itself. This result has been confirmed by additional measurements. However, these analyses should be considered with caution. Indeed, a few mg of material are far below the recommended amounts for carrying out this kind of measurement. We were too close the detection limit of the method to conclude with confidence, although it is sure that the measurement result is an upper limit.

### Discussion

Graphite, organic material and adsorbed  $\text{CO}_2$  cannot be discriminated by this measurement technique. Moreover, the method does not provide information on how any carbon eventually found back in any sample would have been incorporated into the latter. To our opinion, most of the C apparently found back in the surface layer coating results either from adsorbed  $\text{CO}_2$  on the surface of the porous material or from restricted amounts of organic materials sequestered into (or adsorbed on) the material during layer formation or from both of these origins. Any C originally alloyed to copper into the metal would also be found back into the layer after copper oxidation. We have no reason to think that the restricted amount of C found back in the layer by this technique would result from a reaction involving the reduction of  $\text{CO}_2$  into any form of C during reactor operation. These conclusions are applicable to any coating, whether the substrate touched the liquid or not.

#### 7.2.3. *Dissolution tests*

Part of electrode 2 from experiment LQ3-2/EXP/SC/000/281106 was submitted to further chemical tests. These measurements correspond to experiment LQ3-2/CHE/SC/020/071206 as reported in table 2. We cut the electrode into two parts. The first part was immersed into a solution containing 0.1M of EDTA brought at pH 12 by adding sodium hydroxide. The solution was subsequently heated up to 80 °C. The liquid turned blue within one minute and the deposit was completely dissolved within 10 minutes, thereby indicating that the coating contains an oxidised form of copper. No solid residue was visible into the solution after full coating dissolution. Note that the chemicals used here would not heavily attack metallic copper within such a short time.

The second part of the electrode was immersed into a solution containing 1 M of  $\text{NH}_3$  (Suprapure quality). Boiling the liquid during 5 minutes caused also the full removal of the deposit from the substrate, while the solution turned to bright blue as expected from the formation of  $\text{Cu}(\text{NH}_3)_4^{2+}$ . No solid residue was visible into the solution after complete dissolution of the coating. Note that the solution used here could attack metallic copper, but this reaction is quite slow.

The dissolution tests confirm that the surface layer deposit contains essentially an oxidised form of copper. Neither of the chemical solutions used here are able to oxidise C. But by experience, we know that as low as 0.05 wt. % of C in steel leave visible residues in suspension even after a strongly oxidative dissolution into e.g. *aqua regia*, a reagent that is much more aggressive than our solutions. The fact that no residue is visible after our dissolution tests demonstrates that if any C is present into the layer, it cannot be under the form of graphite or diamond. The dissolution tests confirm that any C present in the layer would be under the form of either adsorbed  $\text{CO}_2$  or sequestered (or adsorbed) organic species. Several dissolution tests were carried out using both immersed and non-immersed electrodes prepared at the SCK•CEN. The same results were obtained. Applying the described procedures could readily dissolve all coatings and no solid residues were found into the solutions after dissolution.

#### 7.2.4. *Cu identification by anodic stripping voltammetry*

The dissolution tests described above deliver blue solutions that are characteristic of the presence of copper ions engaged into complexes. To validate the presence of oxidised copper into these solutions, we carried out stripping voltammetry measurements. We performed also similar measurements on the proprietary liquids after they had been used in the static reactor. Figure 23

## Peswiki: M.T. Keshe was 'kidnapped' in Canada over false nuclear weapons concerns

Category: [News](#)

### M.T. Keshe was 'kidnapped' in Canada over false nuclear weapons concerns

*Belgium inventor who claims counter-gravity, propulsion, and free energy generator technologies has been derailed by Ad van den Elshout who has been fraudulently representing the company without authorization, including saying it is involved in nuclear weapons research.*

by [Sterling D. Allan](#)

*Pure Energy Systems News*

It's been over a year since we reported on something from [Stichting the Keshe Foundation](#) in Belgium. Things have been quiet over there, at least from a public knowledge vantage point. But that is not because nothing has been happening. They've been through some severe drama in the past year.

Mehran Tavakoli (MT) Keshe is the one who claims to have a counter-gravity technology and energy generating technology that would enable the kind of flight attributed to UFOs – rapid flight, sudden trajectory change, run on energy harvested freely from the environment. They are involved in research in the sub-plasma nuclear structure. He also claims to have the ability to capture CO2 and methane into liquid form through a nanotechnology and create energy in the process. He also claims to have amazing healing technologies.

Then on January 7, I was informed of the following post by Keshe on his forum:

Since the release of this open letter, we have been furnished with some disturbing evidence from supporters of the foundation that this can explain why the Foundation and its founder have been under such a threat for the past year.

If you know members of press and have contact with them please advise them to keep an eye on this thread, some amazing news to be followed, more amazing than our healing the MS with water and motion of systems with virtually no fuel. We allow you and ask you to post what is to come on this thread anywhere you like on the net.

In the past few days, Mr. Keshe has finally posted some accounts of what has been happening. They are movie material, complete with thugs, theft, corrupt government harassments, spying – all on top of some amazing technology claims. (Perhaps these aren't even the intended announcement; and that will be forthcoming, having to do with a technology?)

The key villain in the saga is [Mr. Ad van den Elshout](#) (Adrianus W.A.J. van den Elshout), who is like [Bob Potchen](#) on steroids. He has registered domains and created bogus business cards to portray himself as the director and owner of the Keshe Foundation. And unbeknownst to the Foundation until recently, he has been going around Europe, China, and Korea misrepresenting the Foundation and drumming up fraudulent business deals in their name.

The posted the following notice on their [About Keshe](#) page

Warning: We are informed that recently a scam was organized trying to collect money from third parties apparently in favor of the Keshe Foundation, Keshe Technologies or as support to build plasma reactor prototypes. Such fraud and deception was organized in Germany by Mr. [Adrianus Van Den Elshout \(NL\)](#) in an attempt to collect money (25,000.00 Euro) for his personal use. Keshe Foundation, Keshe Technologies or Mr. Mehran Keshe are not responsible for the actions of Mr. Van Den Elshout and disclaim any agreement signed by him. This person is not allowed to present, promote, offer or represent Stichting The Keshe Foundation, Keshe Technologies or Mr. Mehran Keshe in any way.

The most damaging misrepresentation has been his false assertion that the Foundation is involved in research and development of nuclear weapons. This lie is compounded by Mr. Keshe's country of origin being Iran. No wonder the Belgium government had been denying his requests for permits to build a manufacturing facility. Many potential employees were left un-hired, and the technology has been tied up as a result.

This all came to a head last June when Mr. Keshe was traveling to Mexico and was held by the Canadian government for 11 days when he passed through their airport on his way, and was then sent back to Belgium. While wrongfully incarcerated in Canada, he was treated in a manner that resembled some dark tyrannical government with arbitrary rule; ransacking his belongings, copying his proprietary files, stealing his property, abusing his person. Keshe describes this abhorrent treatment for [several pages](#).

It turns out that Elshout had contacted the Canadian authorities three days prior to Keshe's passing through their airport, which led to this drama.

According to Keshe, he is not the only scientist who has been subjected to this kind of ill treatment in the name of protecting the world from terrorism. He blames the U.S. in part for this saga, saying they are jealous of his technology which he says is a good 50 years ahead of anything we have (publicly) in the West. He says his peaceful propulsion and energy technologies obsolete nuclear technology. He has assigned the technologies to world dissemination for the people of the planet in the case something should happen to him.

He had been invited to be a guest speaker at the Space, Propulsion & Energy Sciences International Forum ([SPECIF](#)) held at John Hopkins University on [February 23](#) (3:30 pm). He said he was going to demonstrate his technology there, but being denied a Visa, he had to give the presentation via live video conferencing.

His [abstract](#), if read by someone who doesn't know the difference between conventional nuclear weapons and advanced nuclear research, might misconstrue Keshe's abilities and intentions:

Through new understanding of the construction of neutrons, plasma and its subcomponents of Matter, Antimatter and Dark Matter, and in being able to dilute the Matters of plasma within the confinement of a nuclear based reactor, to untangle and liberate in a controlled way the Matters of the plasma, for the use of their dynamic constituent's magnetic fields, for production of energy, Magnetic fields and gravitational fields; for use in space for creation of energy, lift and motion, using the principle of the plasma dilution technology and gravitational positions of different Matters of the plasma within a simple portable safe nuclear reactor.

It's fascinating stuff.

## Canadian involvement in Extraordinary Rendition program and breaking of international laws

*In the text below I explain how I was incarcerated from 08/06/2010 till 19/06/2010 by the Canadian Immigration Office, during this period of time all my scientific data were copied from my computer, and the content of vials (tubes) with CO<sub>2</sub> and CH<sub>4</sub>, and tubes of other nano-materials, were examined and these materials were stolen. MT. KESHE.*

**Canada File case number 3273-6308-8116 date 11.6.2010**

### Extraordinary RENDITION program of scientists used by Canadian government - Belgium, 12-01-2011

The extraordinary rendition program is not for terrorists but is used effectively for scientists in stealing and depriving them of their life long works and their intellectual rights.

In the last [open letter](#) I have explained about how the Keshe Foundation has been accused of being involved in production of an atomic and nuclear bomb for government of Iran in his host nation of Belgium.

After posting of the last open letter, supporters of the Foundation have been furnishing us with e-mails and documents that not only these confirm the close collaboration of the Mr Adrianus WAJ Van den Elshout with government of Belgium, but through the same e-mails from himself, Mr Ad Van den Elshout confirms that he is in contact with the American ambassador and his cabinet and he emphasis on his cabinet in respect to another theft of intellectual property right from another Belgium inventor, which he is offering to the American government, and at the same time, he, in another e-mail again connects himself to another nuclear centre in Belgium.

In receiving these recent e-mails and other communications from others, this have given me the confidence to put my life on line and tell in short as it has been unknown up to now about what a nightmare me and my family have been put through by these actions, I release the following statement on my own behalf and on behalf of my Foundation and not on behalf of any other government, organisation or individuals.

If MY Foundation and I and even if the government of Iran was after publicity in trying to make a big deal out of in what happened to me during the last summer, then we would have shouted and cried out about it on the forum and in the press at that time, when this horrendous matter happened to me and my family.

But as me and the government of Iran, we are dignified, peace loving people and nation, and opposite to what has been made of us, I decided to keep silent about this horrific incident which I was subjected to by the government of Canada through their rendition and intimidation program.

Now seeing these correspondence supplied by the supporters of the Foundation in the past days, for the first time I have decided without asking for sanction from and the knowledge of my country or any other to release the information in how third nations are used for rendition program of scientists to steal their technology and life works under the cover of special rendition program.

**Now I explain:**

As in my last posting of the open letter of 3.1.2011 last week, in simple way I referred in this letter to imprisonment of me and my Foundation.

The imprisonments of scientists **in transit from airports** are and becoming part of the US and Canadian government rendition program, where no one knows about them and apparently it has been going on for years.

They use this transit of transfer from one plane to another by the scientist, to terrorise scientists and raps them of their dignity and let them feel as they have done something wrong, while their technologies and their knowledge are taken off them as the pretending to be investigating their activities by these governments, as if scientists are criminals and then these stolen loots technologies' are shared among the gang of nations for further research and development in their countries in secret. They bank on the fact that scientists are usually from third world or upcoming nations and that the scientists will be afraid to report the matter back to their government on their return. So this rendition program is succeeding and fully carried out with no knowledge about it by public and other nations.

Since when, Canadians have become highway robbers by falsely using the international transit laws?

I start from the beginning and in this section whatever I refer to I have physical evidence to prove my case as I show in few cases below as attached evidence. It has to be said that I have been to USA a number of times and I have been to Canada before, so it is not as I wanted to escape to these countries, secondly I was issued visa to go to USA to meet with NASA in 2005, which I did not take the option of travel and visa has been expired. At the same time I was invited by a well-known US institute as a guest lecturer to give a talk at John Hopkins University in Feb of 2010, which the American government refused the issue of the visa and this lecture was given by live video conferencing as has been announced and talked about on the forum of the Foundation.

This is the exact count of how as nuclear physicists I became part of the rendition program of the US and Canadian government, that they could steal my technologies and for them to access most confidential files and technologies which are developed and being developed by me and my Foundation and these are mostly years ahead of present known science and these are the property of my Foundation.

It has to be said that on my death these intellectual rights become the properties of the United Nation and all citizen of all nations on the earth, that no nation and no religion will have superiority over another and that on my passing all my knowledge become the source and assets of the United Nation and all the religions of the world for advancement of human race in peace and science.

One of the technologies stolen from the Foundation by Canadians and their gang in this so called rendition of me are for example: The technology of how to produce solid CO<sub>2</sub> at room temperature and pressure, which the papers about this has been published on the site of the Foundation for past year. This technology is part of space program of the Foundation and is used to cure cancer with use of water only. This process is used by the Foundation for production of space fuel and allows the production of new materials, which are unknown to world of science and this moment, this material is the fifth state of matter unknown to man up to now that is gases at state of solid at room temperature and pressure.

In fact Canadians during my incarceration and by force they have taken these materials from me, they told me that they will let me have a copy of the report of their tests by their scientist to confirm some of our discoveries and then after my release they denied to release the report as it was too sensitive and a copy of e-mail by Canadian deportation officer sent to me in private confirming this refusal and confirming the theft and how the Canadians have stolen the technology. The scan of the bag which the Canadian immigration after their testing and stealing some of my materials was return to me at the airport is attached, where I was given some of my materials back like a hip of rubbish piled on the floor while I was packing

them to be repatriated.

Another technology they have stolen from the Foundation, is the technology of space motion without use of propulsion which Iranian government has had participated in its development with the Foundation to develop, with this putting Iranians space technology about fifty to one hundred years ahead of USA space program. In reality what they accuse us of doing wrong and developing advance nuclear technology and then they steal the technology, is to cover their own backward propulsion technology which is out of dated, these groundless nuclear weapon development accusation are to steal advance technology and not to monitor as I have experienced first-hand with Canadians.

I can go into detail: but in brief, I was kidnapped on 8.6.2010 by the Canadian authorities on a flight from Brussels to Mexico city in transit through Toronto, I was taken off the flight and me and my family were told immediately without any ambiguity that if press are informed, I can be put in prison which are known to be so dangerous that I can be killed. In this process I was interrogated for nearly four days, deprived of sleep and all my scientific documents and computers were copied and downloaded and some matters were stolen from me and after 11 days of constant terrorising, I was put on a flight back to Brussels like a criminal. My File and case number 3273-6308-8116.

The name of officer in charge Mr CARDINALE rank number 14784. I was put in front of a Kangaroo court in the prison camp itself and I was told that if I tell the judge anything I will be put in prisons that I will not come out alive. Even in the last session I told the judge that I do not agree with what has been said and I could not explain the reason as I was threaten to be killed and everything was falsified in the court to fit their usual procedure.

During up to 18 hours of interrogations daily at the airport and then being kept in secure prison or detention centre, then in the last hours of my release I was told that my release has been ordered by the prime Minster of Canada personally, as even my keepers were not aware of my release. (There is a long story that we do not go through it but if the Canadian government would like to open the case we are pleased to release our documents).

In time of my incarceration by Canadians, my detention officers in prison told me so many times that they do not understand, that you are not the only one like this, we seen in recent years that a number of scientists, doctors and highly qualified people whom are brought here, kept for days and then sent back, but we see drug traffickers and illiterates being given the right to stay in Canada, there is something wrong but this is normal process in this prison. Thus; Canadians like stupid and traffickers and not as they claim wanting intellectual people to join their nation.

It has to be said as I am use to travelling for business around the world for the past thirty years, that sometimes ago a lawyers in UK told me that if ever they stop you at customs or in a country with accusation of entering the country illegally, on the spot you demand asylum, that then they have to report your case to the UN and this stops you going missing for a long periods. And, this is exactly what I did as I came off the plane in Toronto to wait and move to my next flight, where, at the door of the plane's gate and as I was faced with MR CARDINAL, I noticed that he had a full copy of my Foundation site in his hand, and in the first sentence he told me that he has been reading about me for the past three days to become a nuclear scientist and then he said to me at the same time at the gate of the plane that I have entered Canada illegally, were in fact I was in transit to Mexico and international laws explains that transit passengers flight do not require visa.

In the next stage of my dilemma in Canada, it took them over two hours to find my luggage in the flight to the Mexico section as they were panicking as where it has disappeared to, and then after a long time when they found them, then I was taken to an open large empty hall, where at one time, I could count as many as 16 different officers from different forces in the hall around me checking the loot that they could not believe they have stolen. This giving me the feeling of being in the hand of pirates on high seas after taking over the ship as they wanted to share their loot and

could not believe how easy this was.

At all times of search and interrogation they were only interested in contents of my suitcase and the main computer hard disc block, which they knew all my experiments and technological discoveries were logged in and it looked as they knew all things to do with my future research were in my suitcase, as I was on my way to south America to find a new cure for the malaria, as I was invited by an organisation to be there. Where, the ambassadors of these nations can confirm of their knowledge of my plan as I have been in touch with them over past two months before my trip.

Interesting enough, if I was wrong in entering Canada, and my capture was accidental, then how come Mr Cardinale has been studying my site for three days before hand as he told me and secondly I only bought my ticket and my visa to Mexico was issued only less than 24 hours before my departure, and strangely only two other persons were aware of my move, thus this shows that Americans have been planning this kidnapping a long time to capture me, may be from the time of my return from Iran in 2008, and as I was sick and have had suspected cancer, that I could not have travelled since that time, so this was their first chance to look into my technology and steal, as it is well known that I always travel with most of my lab and newly discovered material as I have done, when I went to China, Korea and as I do in Europe and even as I did when I went to Iran for the first time after over thirty years in 2008.

It has to be said up on my return from Iran within a week or so, I attend the office of prime Minister of Belgium on their request, and at the same time they were informed and were asked to collaborate with the Foundation to further develop in what was already developed in Iran by us. So there was not a Mickey mouse game with our openness, and no need to steal. I leave Belgium because my child is born here and the love of my life is a Belgium, and Belgium has been home to us for the past years. Keshe Foundation team almost all are of Belgium of Flemish origin and loyal to the Foundation. The Foundation has been based in this country up to now and we hope we are safe; I am loyal to my nation and will not sell it to anyone unless I am stolen from as the Canadians did.

It is known fact that as a free scientist I teach everywhere and to all nations, now in fact to me Canadian's are like thieves of Baghdad and part of pickpocket team, with methods of distract, intimidate and steal scientist's life works. I think patents are not applicable to any scientist whom their work have been stolen from them by this way, and by laws of patent how can one nation know by stealing and while other have to pay for it. Thus all knowledge of the Foundation and the work of those scientists whom have been through USA scientific rendition program have to become open to all and not loot benefit to selected few whom have and given themselves the right and the opportunity of stealing.

Interesting enough during my incarceration I was told that I have been refused the asylum request against the government of UK and Belgium as I asked for as the latter was the country which I was coming from and the former was where my first travel-document was issued by which I was travelling on. I have copies of their endorsement by Canadian confirming the correctness of my document, They were in such a rush to copy and steal that they left some of their copied papers in my note books which were torn-off and put in the bag and then given back to me at the airport by mistake, this is how I know they have copied over 1000 pages, and 1 terabyte of information from the suitcase, I have a immigration bag which confirms 6 computer keys and hard disk in one bag in their own hand writing.

This is funny, as to save my life, as I had to do, as I became rapidly aware of what I have walked into with Canadians; I had to claim refuge statues from some of the leading free nations in the world the like of Belgium and UK that I had to do this claim to protect my life. I wonder how many people have had to do this in the past century to escape from these free nations.

Thus: the Canadian government uses their detention centre near the airport for rendition of scientists to steal their technology and they share their loot with the ones whom they chose and help them out to carry these atrocities.

May be irrelevant, but one of the officers involved in my interrogation told me that you are one of the biggest fishes' we have ever had and at the same time my interrogators asked and took two copies of my book "the universal order of creation matters" from the content of my suitcase to read.

One officer in the cabin in the airport said to me in the second day that he did not understand why I was kept overnight, we have to greet people like you to join our nation, but decisions are made somewhere else and he made it clear that there was more to my capture that met the eye as it became apparent later on and even six month latter like now.

In some session I counted that there were up to 12 officers in different cubicles around us sending questions and listening to interrogation, in some cases and sessions I had a Chinese looking man and black officer and up to six other people in my cubical, whom were sitting in sessions and asking questions.

Strange enough that within days after my release another Iranian nuclear scientist whom has gone through scientific rendition program was suddenly after a year appeared in USA and then he was released by USA. I am sure he has been as I have been through the same rendition program but in different country.

The officer told me himself in a session during my interrogations, that he was so highly ranked that the officer was answerable to Minster himself direct and during my 12 – 14 hours long sessions of being brought to and kept in the airport every day for interrogation, he told me that there are five other agencies and ministers monitoring the interrogation live on line while he was inputting my answers, which question were coming mostly through the computer screen.

What is interesting to point out, first of all is that if Canada is looking for the edge of science scientists, how come they refuse a leading nuclear scientist refuge application and then they threat to kill him in front of his family to put fear of god into them, except that their plan was from the outset to steal technology of the scientist, as they have done with me.

Secondly, if rendition is so effectively carried out by Canadians and Americans, I wonder how many other scientists like me have been through this rendition program that out of the fear of their lives are silent about these enforced nightmares.

I am aware of one, whom is another Iranian nuclear scientist as has been in the press, but is this rendition program only for Iranian scientists as our research is about decades ahead of western world, and is this wolf cry of nuclear weapon development is the truth about USA wanting to look into what they are years behind in technology than Iran. Do not forget history has shown and are well known the one shouting foul game are the one whom are losing or when they are behind and this is a normal behaviour for the losers.

Further the Canadians knew what they are doing with me was illegal, as every time I was moved from the airport to prison late at night at one or two o'clock in the morning and on my way back from the prison at nine in the morning, there was always a discussion, that by law, security people had to handcuff the prisoner, but the officer and security people were discussing every time that he should not be handcuffed or they discussed that at least until he is in the van and then they be taken off when he comes out of the van walking through the airport. Even on the day of my transport to the airport to leave this godforsaken country the officers taking me to the airport told me that we do not want to handcuff you, we know what is going on and please cooperate. These all was done as they were afraid if I am seen in handcuff and pictures been taken and then they were in hip of manure with the outside world.

If you would like to know what it means to go through a short sharp rendition by Canadians as I have been, it feels like being raped, where the

victim thinks what have done wrong to be in this position and this hunts you for a long time, that you do not want to talk about it and you become secluded as I did, and with the help of family I have started to write and research after months again.

I would like to thank the staff of the Iranian embassy in Brussels that I turned to upon my return to report to them in what has happened to me and they listened and allowed my fears to subside. I would like to thank the dignity by which the Iranian government knowing my ordeal kept its silent about this incident that I could recover from this nightmare and they did not go out to make a case of my suffering and situation. Thank you, you are the real gentleman, and you are not like wolf in skin of sheep as in the cold waters of north-pole nation where I was imprisoned.

I think I leave the rest of what happened to me and my family during and after this highway robbery in Canada with humans of this world to decide about who are the real animals of this world.

**Now interesting information about**, MR (Mr Adrianus W.A.J. Van den Elshout) which shows why the sudden move by the Canadian kidnap job, which we have received these information's in the past week after the release of our open letter from the supporters of the Foundation.

What is interesting to me now after receiving and reading through these e-mails from public at large, is that how a man (Mr Van den Elshout), whom wears trousers with the biggest hole I have ever seen between a man's legs, that shamelessly his genitals are hanging out of them when he sits, that such a man cannot afford a pair of trousers, how can that such a man can see the American ambassador and be aware of the American government diplomatic cabinet set-up in Belgium embassy in Brussels as mentioned in these e-mails by him and organise such a kidnapping.

Maybe Mr water work is good at his job, his nickname in Belgium for Mr Van den Elshout is Mr water work as this man cries like a woman, and it is called by some "the golden tears", when he wants something and when he lies, then he takes a picture of holly something or another out of his pocket and cry's to the picture that floods the room for people to believe him. Maybe American like weeping woman as they feel important and that they can save the woman (Mr Criminal) and this satisfies them with feeling of being the big brother coming to rescue and at the same time that is how the water worker convinced them to believe his lies.

At the time of my incarceration me and my family were in such a shock that we did not want to talk about our pain, but now it has become apparent that Mr Van den Elshout in his own e-mails confirms that he has been in touch with MRHoward W Gutman (the American ambassador to Belgium) and his cabinet on the 19.5.2010, **three weeks before my incarceration**, and talked about god knows what like as we mentioned in the open letter and other plots he is involved in and this e-mail shows whom he is working for.

No one can see the American ambassador and know about the working of embassy except a man like Mr van den Elshout and now even we know and now we are aware from these e-mails that there is an ambassadorial cabinet in the American embassy in Brussels that they work with Mr Criminals ( !!!).

In different e-mails Mr Van den Elshout confirms the need of delivering his stolen technology and be given to NASA, CIA and others (see the attached references) and he refers in different e-mails to the American ambassador again and again. In e-mails he refers to president of USA name in person and connects himself implementing he is in talk with to the American ambassador and his cabinet in the same sentence (attached reference). All these correspondents by this criminal or the agent carry's the ALPHALYS S.A header and signature which is his or other nations company registered in Luxemburg for their clandestine activities in conjunction with water man.

We have been told since the publication of the last open letter that this company is in process or being considered of being closed down.

In other e-mails he refers to getting into another Belgium nuclear centre in Doel near Antwerp. This confirming his interest in nuclear program as we

reported before in the last posting (attached reference).

We are in possession of documents that Mr Van den Elshout shows and confirms being involved in laundering money through Panama account through KBC bank of Belgium and in an e-mail he confirms paying large sums of money in black.

Where do these sums of hundreds of thousands of dollars come from, as he lives with a nail polisher in two bedroom rented flat and according to people who know him his car is mostly not even insured and not even passed its technical control.

We have received evidence that there are five known case of intimidation and fraud with prosecutors of four cities in Belgium, and strange enough no one taken action about them and all have been put away in drawers as he is protected by paedophilia gangs as he says he knows them and are part of his larger relationships and extended family. These are case number for attempted intimidation, death threats and fraud and have been with prosecutors for years and month, case number AN 45.9.550/10 and case number AN 42.98.3582-01 city of Antwerp, Case number 45.F1.5136/2007 city of Kortrijk and two other files in city of Gent and Leuven in Belgium.

And we are in possessions of confirmed document from the city of Antwerp prosecutor that Mr Van den Elshout has threaten one of the leading Belgium inventors that he and his wife will be killed and a tape recording of this has been in possession of the Belgium authorities since 25.6.2010, and up to now the Belgium police has done nothing about this case. MR untouchable we call him or the American agent, god knows, who the next victim is.

We have e-mails and we are in possession of copy of contracts drawn up by this criminal himself, which shows or indicates to that Mr Van den Elshout has close collaboration with Flemish government and its head Minister-President Kris Peeters as a specific contract is signed in conjunction with investment with the Flemish government and Mr Peeters name is specifically mentioned in this contract, thus he has the ears in the government whom listen to his groundless accusations as in the American embassy. Why should the name of Mr first president of a nation still in office be mentioned in a commercial contract, is it to influence or is it to say who is protecting who? It can be seen again he uses the name cabinet of the Minister-President Peeters, so he is well inside and we have been furnished with e-mails which addressees CC to cabinet of Mr Peeters. In the set-up of stealing the intellectual rights of another inventor which this criminal has been in the process of by fraud, this case has been in the hand of procurer of Antwerp for seven month and has been put aside as it seems. I Wonder! If Mr Peeters knows his name and his cabinet is used like this to defraud or there is another motive behind these freedoms, which has been given to this criminal to do what he likes and hide the criminal files in drawers around the country that Mr untouchable become a full grown AL Capone.

In my letter to the procurers of the city of Kortrijk I mention that this man has become untouchable and he can do what he likes and the police does nothing about it, now do we too understand who is behind him and how he is protected.

In the past minutes before the publication of this paper we have been informed of the system Mr Criminal (Mr Van den Elshout) has used and he has been using to import people into Holland and Belgium. The e-mail is self-explanatory; the name on the email is the name of the gentleman as company director on the company (I gave in the last open letter) owned by the criminal in Holland. The address Meer (douanezone) given in this e-mail, is the warehouse on the border of Belgium and Holland, and it was used by the Mr criminal to import illegal people into EU and is registered as his office and the home of imported people to get identity/green cards. This used to be the customs building of the Belgium government at the border. It is known fact that Mr Criminal has been importing people from Turkey and Arab countries on false entries for years they say. Let the police check who is registered in the past three years to live in this warehouse office. We have been informed that Mr Van den Elshout has set-up a new company in Luxemburg for this purpose, the name of the new company is ATHOR S.A.

By the way, we have no evidence but we have been told that this criminal claims' that he has bought a 55,000,000 US dollars company in US according to him? A tape is available in .mp3 of Mr. Ad van den Elshout's confession about that Delaware off-shore company. We wonder if this true then is this the payment for him reporting and stealing technologies for his paymasters? Is this the reason why the Dutch and the Luxemburg companies are closed, now that he has received payment from his masters for a good job of damaging a number scientist's work and lives, now would he become good American citizen?

My advice to all scientists is that do not carry any of your works with you when travelling, even if you are going for research project or presentation to a conference, as you without knowing become a victim of the false rendition program for these governments as I did.

In conclusion: The Canadian Government and its bosses are involved in special stealing rendition program under the cover of terrorism as I have experienced it first hand, but what is interesting is that I was invited to Canada to give a talk to scientific community in Canada and we offered a sector of our technology for joint development to a university in Canada three month before and visa was refused for the trip and presentation too, we have the refusal application number if needed to be produced. But I presume is hard to kick the old habit, once a thief always a thief. May be we should call the **Maple leaf** on the flag of the Canada a **Maple thief** of Canada and this should become the new flag for pirates on high seas in the coasts of east Africa.

Ref 3: Self explanatory return of goods certificate on departure from the Canadian immigration after 11 days of incarceration.

Mehran,

this is remarkable:

Naam Saadou, Ibrahim / 4

Geboortedatum en - plaats: 30-09-1963, Beirout, Libanon

Infunctietreding: 13-02-2008

Bevoegdheid Volledige volmacht

Uit functie: 15-02-2008

Thus Abraham Saadou was only two days in the company with full powers.

Probably AVDE was able to register Saadou for a workpermit in Belgium or Holland, because Saadou was part of the company.

Once the permit was given (granting Saadou a kind of legal residence in Europe), Saadou was removed.

If I remember well Saadou was said to live in Meer (douanezone). I remember AVDE telling that a police guy came there to check the presence of Saadou. The policemen (from Hoogstraten) got a free TV-set as bribe.

Best regards.

Ref 3 : E-mail received in explaining how immigrants are nationalised/officially permitted by use of companies in Holland by the criminals and activity of Mr Adrianus Van den Elshout companies. [Document KVK](#) about the 2-day entry of Mr. Saadou.

Thans is het sportief ten overstaan van de heren ..... en ..... hierbij te melden dat zij met ondergetekende nog niet aan de nieuwe patatten toe zijn, en ondergetekende alles in het werk zal (doen) stellen om als goed huisvader diens rechten veilig te stellen, waarbij het benaderen c.q. informeren van o.a. Mr. Howard W. Gutman en diens President Mr. Barack Obama thans als eerste prioriteit gelden, gevolgd door de contacten met de AmerikaanseNASA, US Air Force, de CIA, doch ook instanties als de Kerncentrale te Doel.

# Energie uit internet, zand, water en chips

## Duurzaamheid op z'n Elektors

Wisse Hettinga (Redactie)

Laat duidelijk zijn; op het gebied van energievoorziening en duurzaamheid speelt Elektor een minimale, zeer bescheiden rol. Sterker; in de tientallen jaren van ons bestaan hebben we bijgedragen aan een flinke CO<sub>2</sub>-uitstoot met al onze meetinstrumenten en soldeerbouten. Kunnen we dat goed maken?

Een bescheiden rol betekent niet dat we geen mening hebben over energie en/of duurzaamheid. Zoals altijd geldt: als je onderdeel bent van het probleem, ben je ook onderdeel van de oplossing. Hieronder een kleine collectie van onderwerpen die we typisch Elektor vinden.

### Bloom Box – feit of fictie

Het had niet veel gescheeld of deze ontwikkeling was zomaar aan ons voorbijgegaan. Gelukkig hebben een aantal prominente figuren zich over het bedrijf ontfermd en gezorgd voor een flinke hoeveelheid publiciteit. Colin Powell *himself* zit in het bestuur van het bedrijf en de lancering van deze energiecel heeft veel weg van een Apple aankondiging - zelfs Arnold Schwarzenegger komt graag even langs om het evenement wat kracht bij te zetten.

Ze weten bij Bloomenergy [1] zeker de aandacht naar zich toe te trekken, maar ook critici laten hun oog op de ontwikkelingen rusten. Bloom Box heeft een brandstofcel ontwikkeld op basis van 'zand'. Daar hebben we genoeg van, hoor ik hele volkstammen denken, maar dat zand gaat niet zomaar uit zichzelf energie opwekken. Officieel heet het een 'solid oxide fuel cell'. Zand wordt tot tegels gebakken, aan beide zijden voorzien van verf en met elektrodes uitgerust en voilà: een compacte brandstofcel. Collega Ernst zit diep in de brandstofcellen en stuurde de volgende notitie:

*Note to Bloombox:*

*In theory, the solid oxide fuel cell (SOFC) used can achieve a system efficiency of 55-66%, which is in the range of the most up to date conventional power plants using gas turbines (60%). So when operating with natural gas, there is no progress with regard to the CO<sub>2</sub> balance compared to older techniques. The only advantages seem to be the*

*decentralized structure and low conduction losses (accounting for a few percent).*

*Basically the same applies to bio gas powering, but the efficiency of the SOFC (Bloombox) could be a little higher than that of a conventional bio gas plant of equal size (larger biogas platforms are more efficient).*

*I believe the solution employing much smaller block-type power stations is considerably smarter and more efficient because:*

- *Better CO<sub>2</sub> balance by using the waste heat, with an overall efficiency 94% (which is obviously not the case with Bloombox),*
- *Smaller, decentralized units (flexible, safe supply, existing funding model)*
- *Proven, durable and cost effective technology.)*

### De Pringles-batterij

In ieder huis kun je wel een heel bijzondere vorm van energie vinden - laten we hem de Pringles-batterij noemen. Hij staat meestal in de bijkeukens van huizen en laadt zich langzaam op met de som van talloze afgedankte batterijen. Elektor - altijd nieuwsgierig - stelde zichzelf een aantal eenvoudige vragen over deze batterij: Hoeveel batterijen zitten er in zo'n Pringles-bus? Welk gewicht hebben ze? Welke samenstelling? En kunnen we erachter komen hoeveel energie er nog zit in zo'n Pringles-batterij? De resultaten zijn: 25 stuks AA, 14 x AAA, 2 x 9 volt, 3 x heavy duty 1,5 volt, 14 knooppellen en verder 25 lekkende batterijen in alle bovengenoemde vormen en maten. Het aandeel lekkende batterijen ver-

raadt dat we hier te maken hebben met een Pringles-batterij die minstens een jaartje dienst doet. Verrassender is het dat er toch nog een flinke hoeveelheid energie tevoorschijn wordt gehaald uit de niet lekkende partij. Batterijen blijken uitstekend geschikt voor een 'tweede toepassing'; zuinige LED-lampjes, klokjes, kleine elektronische schakelingen en daarna pas in de Pringles-bus!

### Instant Electronics - Just add water

The continuing Keshe [2] story. Deze man is de afgelopen 30 jaar bezig geweest met het uitvoeren van zijn droom; opwekken van energie uit niets. Zijn naam is Mehran Keshe en hij staat op het punt zijn droom waar te maken. De afgelopen jaren heeft Elektor regelmatig contact gehad met deze bijzondere man.

Het is natuurlijk het gemakkelijkst om deze ontwikkelingen naar het land der fabels te verwijzen, maar tegelijk hebben we ook een opdracht om deze ontwikkelingen te rapporteren. We houden het op het laatste. Zijn eerste demonstratie, 3 jaar geleden, vond plaats in een randweghotel in Antwerpen. In een Colafles bootste hij na wat in het heeel continu gebeurt en het resultaat was een kleine spanning. We zijn ondertussen een aantal jaren verder en hij heeft zijn technologie verder ontwikkeld. Maar wanneer is een bewijs een bewijs? 'Laat eens een LED branden', was ons verzoek en november 2009 belde hij met de mededeling; de LED brandt. En de LED gaf zelfs na een aantal weken nog licht, waar wij verwachtten dat hij het na een aantal minuten al op zou geven. Dat wilde we toch graag met eigen ogen zien en een aantal weken geleden hebben we dhr. Keshe opnieuw uitgenodigd voor een demonstratie in ons lab. Na afloop hebben we toch weer eens goed op ons hoofd moeten krabben. We zien wat er gebeurt, we zien het resultaat, maar we kunnen het niet doorgronden. Met simpel serie- en parallel schakelen van zijn cellen lukt het hem om serieuze spanningen en stromen op te wekken. Wat zien we: Bij de demonstraties van dhr. Keshe is het altijd een beetje houtje-touwtje. Zijn demonstratiemodel is een plastic verzamelpak zoals we die gebruiken voor schroeven en componenten. Daarin twee metalen zoals we dat kennen van onze elektrolyseproeven. Het verschil is dat een van de metalen een speciale bewerking heeft ondergaan. Nu alleen nog leidingwater erbij en het wonder geschiedt; we hebben spanning en stroom, genoeg om een com-

puterventilator te laten draaien. Na een kleine twee uur stopt het proces en de ventilator komt tot stilstand. Rondom de draden in de plastic bak heeft zich een afzetting gevormd die de verdere opwekking van elektriciteit stopt. De afzetting is CO<sub>2</sub>, volgens Keshe en later toegestuurde rapporten bevestigen dat.

Instant electronics - just add water! Daar lijkt het allemaal om te draaien. In gedachten zagen we een zaklamp waar we in plaats van batterijen in stoppen, water in laten lopen, zodat we een lamp hebben die in principe altijd licht kan geven. Een paar weken later krijgen we een mailtje met een foto; de zaklamp doet het!

### Tech the Future

Welke rol speelt technologie in het oplossen van de grote vraagstukken over energie en duurzaamheid. Technologie speelt een dubbelrol - veroorzaker en oplosser. Iedereen met een beetje verstand van de wet van ohm weet dat er niets onvoordeliger is dan jezelf voortbewegen met behulp van elektriciteit - dat ons energiedistributienetwerk gewoon niet geschikt is voor de toenemende vraag aan elektrische energie... maar, wat dan wel? Hoe kan technologie een rol spelen in de oplossing van deze vragen?

In ieder geval speelt informatie een sleutelrol. Mensen op de hoogte brengen van de laatste ontwikkelingen, oplossingen noemen, vragen stellen, dwars denken; het moet allemaal gebeuren. Een taak typisch voor Elektor. En om dit proces een zetje te geven, gaan we een samenwerking aan met de website Techthefuture.com.

Belgische wettig erkende beroepsvereniging voor Naturopaten

## Certificate of acceptance of 'Keshe Plasma Therapy'

To whom it may concern,

Naturopathica (registered number = 0.820.205.967) is a Belgian legal recognized association for naturopaths.

Naturopathica negotiated a collective professional liability insurance with 'Mercator Verzekeringen NV', through intervention of insurance broker 'Hermes Verzekeringen NV', Uitbreidingsstraat 184, 2600 Antwerpen. The price for this insurance is included in the membership fee.

During October and November 2011, the 'Keshe Plasma Therapy' has been the subject of formal evaluation by the 'commission Naturopathy' of Naturopathica for possible inclusion in this insurance.

The 'Keshe Plasma Therapy' is based on original inventions of M.T. Keshe, for which he has filed and owns several international patents pending. The therapy consists of the regular intake of water and/or the inhalation of air, and environmental plasmas, which have been exposed to plasma magnetic fields information. The definition of 'plasma' stands for the 'origin' of each element different magnetic fields strength, not for the fluid in the blood.

The therapy has been accepted in our 'therapy matrix' as a new form of 'bio-energetic therapy' by the board of governors of Naturopathica (on 26/11/11) for addition in our group insurance. On 10/01/2012 several new therapy forms – including the 'Keshe plasma therapy' - have been accepted into our group insurance by 'Mercator Verzekeringen NV'.

Members of Naturopathica are allowed to practice this therapy only after having received the necessary formal trainings by Mr. Keshe and/or his appointed education team.

## Certificate of honorary membership

To whom it may concern,

Naturopathica (registered number = 0.820.205.967) is a Belgian legal recognized association for naturopaths.

Naturopathica has accepted Mr. M.T. Keshe as a honorary, non-working member ('erelid'), based on special merit in the field of restauration of natural health.

This membership implies acceptance of our 'ethical code' and of our 'code of conduct'.

The membership is valid from 01/01/2012 till 31/12/2012 and can be yearly renewed.

## 2014, the year of the change for the Humanity

01-01-2014, 11:48 PM

2014: The Year that the new Technology will change the course of humanity and it will bring untold changes.

At Keshe Foundation, we make 2014, the year that advanced technologies will be mass-released to public that they can show their power to create conditions that change through all layers of human society will be achieved.

We shall put an end to hunger and wars, through the release of everything in our possession, this be it scientifically, or technically to every man, be it scientists or world governments around the world in equal measure.

In 2014, the Keshe Foundation through its Institute shall deliver to mankind as a whole the technology, which the mankind has been waiting and praying for from the beginning of time.

With delivery of an advance technology, unknown up to now, we shall put an end to hunger, wars.

We shall make sure that all men will have enough to attain sustenance and shelter that; there shall be no need for suffering.

We give and facilitate the release of technology to the men of greed that they can produce enough gold and precious metals that they could wish for, that eventually they will shy away even to show any interest in possessing such materials.

In opening the space in 2014 in its true sense, we would bring in more precious materials and sciences unknown to man that these new materials and knowledge will be used for forging tools of lasting peace on this planet.

The 2014 will be the beginning of the new era, the point of change for the humanity from what has been the same on this planet from the time of Adam.

We make one promise to the world leaders and that is, change your and your nations ways or your citizens shall change it for you through the delivery and application of the new technology and its use.

No man shall and from this year on will be allowed to take up arms to fight and no man shall be left hungry and homeless on this planet because of wars.

Use your arm manufacturing factories to deliver homes and food to the humanity, which up to now you have being developing tools of war in them, and you have instigated, unwanted wars because of them.

As the man who has the knowledge of universe at his disposal, I shall use every knowledge and power available to me to bring these factories, which you have erected for making tools of war and their products to standstill with stroke of a pen.

Then we wonder who shall disobey as is in the books of god that "one shall not kill."

The promises of the change, as has been in the Holly books of the past, which the man has been waiting for centuries for shall be fulfilled.

Our program for this year is set to be.

We shall put an end first and foremost to the problem at Fukushima in January.

In February, we make all efforts to create the environment to stop the production of arms across the world, through release of technologies, which makes the present advance aircraft, missiles, and nuclear weapons irrelevant and ancient.

In Jun, we will deliver technologies, which can deliver sustenance's to world population totally free of any cost through the release of new systems that can change air into sustainable food and energy supply without a need

for farming land that no child will sleep with hunger.

By September, we will deliver the technology for every man to be protected from the natural elements like cold and rain without being dependent on other man handout of tents.

We shall make delivery of clean water at any point on earth free of charge a reality by releasing the already developed technologies.

By the end of December we will make sure, that there are no grounds for disruption for space travels on regular bases from all the nations on this planet that all shall harvest the reaches of the universe collectively and equally.

Those who have doubts about our work, be ready to become soldiers of the peace and unity before the end of this year.
